**Computer-aided Scheduling and Dispatch in Demand-responsive Transit Services** Apr 24 2022 The scope of this synthesis is to (1) search out useful information on the use of

computer-aided scheduling and dispatch (CASD) in demand-responsive transit (DRT) services, (2) develop an amalgamation or compendium of the current knowledge and successful practices used in computerizing the functions necessary to efficiently and effectively operate such DRT services, and (3) report on measures used to resolve specific problems in planning and implementing CASD. The ultimate objective in compiling a considerable storehouse of information is to make this information available to the public transit community. Private and nonprofit organizations that are providing DRT services will similarly benefit from a review of these results.

*The Will to See* May 02 2020 An unflinching look at the most urgent humanitarian crises around the globe, from one of the world's most daring philosopher-reporters "Call[s] on people not just to see the world, but to be moved and interested by what they find there, and to do something about it."—Anne Applebaum, *The Atlantic* "Fierce and elegant, Lévy's musings will be of profound interest to any reader of modern continental philosophy."—Kirkus Reviews, starred review Over the past fifty years, renowned public intellectual Bernard-Henri Lévy has reported extensively on human rights abuses around the world. This new book follows the intrepid Lévy into eight

international hotspots—in Nigeria; Syrian and Iraqi Kurdistan; Ukraine; Somalia; Bangladesh; Lesbos, Greece; Libya; and Afghanistan—that have escaped global attention or active response. In a deeply personal introduction, Lévy recounts the intellectual journey that led him to advocacy, arguing that a truly humanist philosophy must necessarily lead to action in defense of the most vulnerable. In the second section, he reports on the eight investigative trips he undertook just before or during the coronavirus pandemic, from the massacred Christian villages in Nigeria to a dangerously fragile Afghanistan on the eve of the Taliban talks, from an anti-Semitic ambush in Libya to the overrun refugee camp on the island of Lesbos. Part manifesto, part missives from the field, this new book is a stirring rebuke to indifference and an exhortation to level our gaze at those most hidden from us.

*Everything You Wanted to Know about Indians But Were Afraid to Ask* Dec 09 2020 Treuer, an Ojibwe scholar and cultural preservationist, answers the most commonly asked questions about American Indians, both historical and modern. He gives a frank, funny, and personal tour of what's up with Indians, anyway.

*Simple Truths* Apr 12 2021 Seldom does a book come along that speaks to the core issues of life with such clarity and wisdom. This profound book is deeply informed by the spiritual traditions of the West, the Far East, and the Native Americans, with whom the author has worked. It is a small treasure of wisdom about

life's deepest issues. From the Book . . . ON EDUCATION & LEARNING The true measure of your education is not what you know, but how you share what you know with others. ON MONEY People who measure their money against their desires will never be happy, because there will always be another desire waiting to lure them. People who measure their money against their needs can gain control over their lives by gaining control over their needs. ON LOVE Love has its own time, its own season, and its own reasons for coming and going. You cannot bribe it or coerce it or reason it into staying. If it chooses to leave your heart or the heart of your lover, there is nothing you can do and nothing you should do. Be glad that it came to live for a moment in your life. If you keep your heart open, it will surely come again.

**Emergency Response Guidebook** Jul 16 2021

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take?

Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them.

Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

**The Art and Science of Training** Feb 08 2021 There are more similarities than differences between how artists and scientists work. Both ask countless questions. Both search in earnest for answers. Both are dedicated to reaching the best results. Not so different from today's trainers, are they? Elaine Biech, one of the most highly regarded names in talent development, has set out to identify the perfect blend of content mastery and

audience insight. The result is this highly informative book. The Art and Science of Training presents the science for learning and development, but it also emphasizes that training success lies in knowing what to do when things don't go as planned. Discover how top facilitators always put learners first, even when faced with exceptions to the rule—the unwilling learner, the uninformed supervisor, the inappropriate delivery medium, or the unmanageable performance challenge. And learn why you must understand people, not only content, to ensure consistently exceptional learning experiences. Science is both a body of knowledge and a process. Art is the expression of creativity and imagination. Where they intersect is the best way to help others learn and grow.

**Reinforcement Learning, second edition** Jul 24 2019

The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience,

as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.  
**Out of Darkness** Jul 04 2020 A 2016 Michael L. Printz Honoree "This is East Texas, and there's lines. Lines you cross, lines you don't

cross. That clear?" New London, Texas. 1937. Naomi Vargas and Wash Fuller know about the lines in East Texas as well as anyone. They know the signs that mark them. They know the people who enforce them. But sometimes the attraction between two people is so powerful it breaks through even the most entrenched color

lines. And the consequences can be explosive. Ashley Hope Pérez takes the facts of the 1937 New London school explosion—the worst school disaster in American history—as a backdrop for a riveting novel about segregation, love, family, and the forces that destroy people.
